

SAP AMS Service Level Agreement & Operational Runbook

Customer: Global Manufacturing Operations | **Service Provider:** NTT DATA AMS | **Version:** 2.4 (Effective: 2026-2027)

1. Service Scope and Operational Objectives

This document establishes the binding Service Level Agreements (SLAs), classification rubrics, and emergency operational procedures governing the SAP Application Management Services (AMS) contract. The covered scope includes production instances of SAP S/4HANA (Client 100/200), covering functional modules FI (Financials), SD (Sales & Distribution), MM (Materials Management), as well as technical domains ABAP development and Basis system administration. The primary objective is to guarantee business continuity, rapid containment of operational stoppages, and strict adherence to ITIL-aligned restoration procedures.

2. Incident Priority & Response SLA Matrix

All incoming support tickets must be triaged according to the severity matrix below. Target resolution times represent maximum elapsed time from ticket creation to technical restoration.

Priority	Severity Classification	Target Response	Target Resolution	Escalation Authority
P1	Critical Outage: Core plant or site completely halted	15 minutes	2 hours	L3 On-Call Lead + Service Delivery Manager
P2	Major Degradation: Entire department workflow blocked	30 minutes	4 hours	L2 Specialist + Module Duty Manager
P3	Medium Issue: Workaround exists or non-critical task delayed	2 hours	24 hours	Functional Lead (FI/SD/MM/Basis)
P4	Minor / Routine: Single user inquiry or cosmetic defect	4 hours	72 hours	Service Desk L1 Team

3. Emergency Transport Procedures (STMS)

Emergency software corrections and hotfixes requiring transport release outside standard weekly maintenance windows must follow strict governance. An Emergency Change Request (CHG) must be approved in writing by the Basis Lead and the functional Module Owner. All emergency transports must be verified in QAS quality assurance prior to importing into PRD. Bypassing the standard transport route (DEV -> QAS -> PRD) is strictly prohibited under any circumstances.

4. Emergency Contact Directory
